RAK-DES

Form follows function

RAK-Des is a new concept bathroom suite that pays tribute to the Bauhaus school by which it is inspired, on the occasion of the centenary of its foundation (1919). RAK-Des includes bowls and freestanding washbasins with the essential minimalist lines. The rectangular washbasins of this collection can be installed suspended, individually, or combined with the RAK-Joy vanities.

All ceramic cistern codes refer to bottom inlet version; all washbasin codes refer to one tap hole version, unless differently specified.

## Quality design for international tastes

RAK Ceramics product development has created a very wide range of products with carefully finished details and quality design to suit international tastes, incorporating the latest rimless technology.

Carefully designed and engineered with the aid of the latest 3D CAD softwares and prototyped with 5 axis CNC machines, RAK Ceramics Sanitaryware range has the perfect solution for your bathroom, whatever you have imagined.

## Rimless technology

RAK Ceramics delivers the ultimate in technology for bathroom suites. Based on similar design specifications to sanitaryware in hospitals and medical centres, RAK Ceramics Rimless water closets allows you to experience the same high standards of hygiene in your own home.

RAK Ceramics continues to set new standards of hygiene and water efficiency in the sanitaryware industry, with uniquely engineered water flushing systems that effectively remove waste, helping to keep bathrooms fresh and hygienic.

### **WATER SAVING**

Using just 4 litres for the full flush and 2.5 litres for the half flush, water usage is reduced by a third.

### **HYGIENIC AND EASY TO CLEAN**

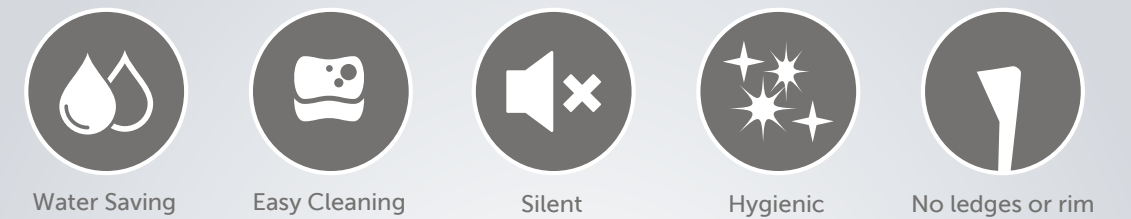

The water closets have no rims to harbour germs, making cleaning quick, easy and more hygienic.

### **SILENT FLUSH**

Rimless technology allows a faster and more silent flush.

### **EFFICIENT DESIGN**

Design and efficiency can be successfully combined. Water flows vertically and horizontally, before flushing the entire inner surface of the bowl, without splashing.

**Rimless**

## Hidden fixation systems

Our wall hung and back to wall products are benefitting of the collaboration with Fischer Group, one of the industry leaders. The use of the most innovative Fischer fixing systems, is allowing us design freedom on the ceramic, better aesthetics and more safety for the installer.

The Hidden Fixation System is comfortable and time saving, in fact one-man installation is made possible by the clip system that keeps the ceramic held up during the installation.
