RAK-DES

Form follows function

RAK Ceramics pays tribute to the Bauhaus school.

This maxim by the Architect Louis Sullivan is a principle of design associated with late 19th and early 20th century architecture and industrial design in general, which states that the shape of an object should primarily relate to its intended function or purpose. The same principle is followed by the new concept suite RAK-Des, that pays tribute to the minimalistic style of the Bauhaus school.
