CERAMICS

RAK-Washington is inspired by a timeless elegance based on lightness, cleanliness and essentiality. The same elegance typical of the classical sculpture.

ANTONIO CANOVA

"Dancer with hands on hips".
White Carrara marble hand carved.

Quality design for international tastes

Perfect, absolute shapes reveal the origins of the concept of elegance and give a tangible meaning to the word "beauty". Pure, intense, calming, timeless, beauty transforms spaces and remains forever engraved in the memory of those who for a moment stop to admire it, in silence.

Can we save water in our bathrooms?

One of the easiest ways to save water is to install a toilet with a dual-flush cistern.

Dual-flush cisterns let the user choose how much water to use when flushing the toilet and they are designed for wall-hung, back-to-wall and close coupled water closets.

RAK Ceramics flushing systems, allow you to choose using the full flush or the half flush, with different flushing volumes: 6 Liters for the full and 3 Liters for the half flush. The cisterns can also be adjusted to flush with a reduced full flush volume at 4.5 Liters.

For countries with limited water resources, RAK Ceramics has developed innovative water closets perfectly flushing with a reduced 3 Liters single flush.

By using a lower volume of water to flush the toilet you can dramatically reduce your annual water consumption.
