## **Focused on ceramics' expertise**

RAK Ceramics is one of the largest ceramics' brands in the world. Specialising in Ceramic and Vitrified wall and floor tiles and sanitaryware, the company has the capacity to produce 123 million square metres of tiles and 5 million pieces of sanitaryware per year at its state-of-the-art plants across the United Arab Emirates, India and Bangladesh.

Founded in 1989 and headquartered in the United Arab Emirates, RAK Ceramics serves clients in more than 150 countries through a network of operational hubs in Europe, Middle East and North Africa, Asia, North and South America and Australia. Across global operations the company employs approximately 15,000 staff from more than 40 nationalities. RAK Ceramics is a publicly listed company on the Abu Dhabi Securities Exchange in the United Arab Emirates and as a group has an annual turnover of approximately US\$1 billion.

## Innovation and wide range

Innovation is the heart of RAK Ceramics philosophy and the company is a pioneer in introducing hi-tech innovations that are a breakthrough in the industry and a world leader in the production of Ceramic and Vitrified tiles ideal for use of indoor & outdoor spaces for wall and floor coverings for residential, retail and industrial projects.

A wide range of technologies are used at the state-of-the-art plants including big slabs pressing technology, advanced digital printing technology for industrial decoration & effects, translucent, double & triple charged feeding systems, digital soluble salts, thermal resistant komfy glaze, slim, anti-microbial, glow in the dark, and other advanced technologies. RAK Ceramics is known for the wide product range and size range and for its ability to produce bespoke ranges for both small and large scale projects, enabling its clients to bring their idea to life.

## Quality makes us different

Bureau Veritas Certifications verified the implementation of RAK Ceramics' integrated quality management system and certified the company with the scope of covering the design, development, production and supply of Vitrified floor and wall tiles.

Being a corporate founding member of IGBC (Indian Green Building Council), RAK Ceramics supports the promotion and development of sustainable buildings in India.

### Certifications

## The world's leading ceramics lifestyle solution provider

RAK Ceramics helps architects and interior designers create icons and build marvels. It provides sustainable materials that inspire ideas, shapes and hues designed to freely express any style. Unique and inspiring products that realistically resemble natural materials, with unlimited choice.

RAK Ceramics gives Vitrified perfection and limitless imagination. Its passion and expertise combined with a careful attention to details enables it to provide designers and end users with a wide range of integrated ceramics solutions, allowing their freedom to be creative and plenty of room for imagination.

## RAK CERAMICS INDIA

In India, RAK Ceramics has the largest and most modern vitrified tile manufacturing plant in Samalkot in Andhra Pradesh with a manufacturing capacity of 30,000 sq. mtrs. of vitrified tiles. 3000 sanitary ware pieces/day. RAK Ceramics also has a Joint venture ceramics tile manufacturing plant in Morbi in Gujarat which is operative since mid-2017 and another mega slabs manufacturing plant in Gujarat is operative from Feb 2019.

The company has more than 8000 designs and shades, making it among the largest range of products globally. A wide range of sizes of vitrified and ceramic tiles enables its customers to design an abode out of their spaces giving them plenty of room for imagination.

Currently RAK products are available through a close knit network of 9 Exclusive Company Showrooms and over 800 dealers across India.

Some of our prestigious Indian projects are: -  
TCS CORPORATE OFFICE - MUMBAI, L&T LTD - MUMBAI, RELIANCE INDUSTRIES LTD - MUMBAI, INFOSYS - BHUBANESWAR, WIPRO TECHNOLOGIES - PUNE, ORACLE - HYDERABAD, HYDERABAD INTL AIRPORT - HYDERABAD, SHILLONG Airport - ASSAM, MICROSOFT TECHNOLOGIES - BANGALORE, COCHIN AIRPORT - COCHIN, NAVAL TATA HOCKEY ACADEMY - JAMSHEDPUR and Many More.

# Wood

*Be inspired by wood effect tiles*

Natural-looking tiles are one of the key trends for indoor and outdoor floor and wood is one of the most popular choice thanks to its versatility and beauty. Combining the aesthetic quality of natural timber with the durability of porcelain tiles, wood effect tiles are the perfect option when replacing a floor in a renovation project or laying a new floor in a newly built property, as it helps in creating your own personal style.

Parquet floor tiles can give any room the elegant look of hardwood, in an eco-friendly new way. It's waterproof, highly resistant to scratches and chemicals, easy to clean and resistant to heat and frost. It definitely looks like a good idea!

# Stone

*No better way to create a relaxing environment*

RAK Ceramics reinterprets the ancestral charm of stone and transforms it to one of the most preferred material in contemporary architecture.

Solid, durable and extremely versatile, the stone-look tiles have special features and highly attractive visual impact. A traditional mood that is able to define interior design projects with a modern appeal. RAK Ceramics' stone collection is inspired by various types of stone existing in nature and is the ideal choice to create a particularly welcoming atmosphere that suits a sophisticated environment, giving a sensation of wellness and relaxation.

Resistance to acids & alkalis (with exceptions of HF acid and it's compounds)	BS EN ISO 10545 – 13	Minimum B	Minimum B	Class A No visible effect
Resistance To Staining	BS EN ISO 10545 – 14	Min Class - 3	Min Class - 3	Min Class - 3 Stain removed
Scratch hardness (Moh's scale )	EN -101	Manufacturer to state classification	Manufacturer to state classification	Minimum-5

Note : \*Colour shown in this catalogue may vary with the original tile.  
 \*Slight shade & size variation is an inherent property of ceramic/vitrified tiles.  
 \*\* With exception of Hydrofloric Acid and M compound

Disclaimer : RAK reserves the right to delete & amend either totally or partially, any of the colours, shapes, sizes, references and other technical specifications contained in this catalogue at any time. The colours shown of tiles in this catalogue are purely illustrative and limited to printing process. Please refer actual sample before final selection. The details of colours, sizes, references should be verified for Typographical errors. SHADE & SIZE VARIATION are inherent characteristics of ceramics. NO COMPLAINT SHALL BE ENTERTAINED ON TILES ALREADY LAID / FIXED. Complaint of decoration done outside RAK's facilities will not be entertained.

### MAINTENANCE AND CLEANING OF TILES

---

Maintenance of ceramic and porcelain tiles on dry surfaces is relatively easy. RAK Ceramics tiles are highly scratch and stain resistant.

- By regularly sweeping the floor, you can help avoid scratches that small pebbles or sand can create.
- Make it a habit to always wipe the soles of your shoes on a mat before entering the house. Thoroughly wipe up any spills using plain warm water.
- While they are not likely to stain your ceramic tiles, spills may stain the grout between the tiles and if they are left to sit for too long, may also stain the actual tiles.
- Plain water is the ideal cleaner because it leaves no residue if you dry the surface of the tiles thoroughly after cleaning.
- If tiles are left wet after cleaning, there may be some unsightly mineral residue after the water dries, but this can easily be removed by spot cleaning.
- If stains resist cleaning with water alone, you can use a mild acidic solution, such as white vinegar. Use it highly diluted and rinse with plain water then dry.
- As food stains are acidic in nature, try using a mild alkaline solution.
- Use common detergents sparingly, rinse with plain water and dry thoroughly.

### TILE - LAYING RECOMMENDATIONS

---

All RAK Ceramics products are subject to size and shade variations. Please check the size, batch number, caliber, tone, choice, color, quality of the pieces before the installation, as no claims will be accepted once the tiles are installed.

Place some tiles on the floor - 2 or 3 sqm - and check the overall technical and aesthetic characteristics with care and check if there is enough product to finish the work.

Manufacturer's responsibility is only limited to replacement of defective material if any, prior to fixing of tiles and we will not entertain claim of any nature after the tiles are installed.

Therefore, if any issue is found on the delivered product, the contractor for installation or the client should not install the tiles. The issue should be communicated to RAK Ceramics for investigation and further action for resolution as required.

The substrate must be a compact cement bed. Levelling system ensures flatness between tiles avoiding movements during the mortar setting. This reduces the time for the ceramic laying obtaining a perfect lippage-free finish. Avoid movements between the tiles due to the mortar setting.

The width of grout joints must be established by the installation supervisor, unless grout widths are regulated by national laying standards. The grout colour should be selected according to the colour of the tile. We recommend to select a matching colour. Before using fine-grain coloured grout on lapped, polished or brushed products, always test it. If the pigment is very adhesive, it may be very difficult to remove.

We recommend to lay the tiles by using suitable adhesives for each kind of product and surface. As general rule, tiles must be installed in the same position. The minimum joint is 2 mm for rectified tiles, although we suggest a higher joint for big size products. After grouting, remove any excess product as quickly as possible by repeatedly washing the area with a sponge and water.

Steps to follow 1. First, set the tool to the scale according to the ceramic thickness. 2. Introduce the crossheads and continue laying the adjacent tiles. 3. Put the wedges in the crosshead manually. 4. Tighten the wedges with the pliers to level the pieces. 5. Allow for setting for the time recommended by the manufacturer of the adhesive cement. 6. Remove the crossheads. Hit the crosshead with a rubber mallet or with your foot in the direction of the joint. Do not hit the wedges.

The company will not accept any claim if this is due to the problems caused by not following these suggestions and instructions.

## ICONS

### TYOLOGY

### EDGE

### SURFACE STRUCTURE

Tiles with an even and regular surface, free from perceptible projections, lumps, or indentations.

Tiles with an uneven, irregular surface, with a structure perceptible to the eye and touch.

Tiles with a highly irregular surface.

### FINISH

Pressed tiles without further work after firing.

Semi polished/honed products achieved by polishing the tile's surface with an abrasive wheel, not long enough to attain the luster of a typical polished tile.

A ceramic lapping process performed with the finest abrasive grain, aimed at removing the smallest imperfections and glaze.

Pressed tiles with a smooth pad, subjected to a strong mechanical processing, by removing a significant amount of material after firing, making the surface bright.

A silky smooth surface, with a satin look, that is soft to the touch and pleasant to walk onto.

### SURFACE LOOK

Natural looking surface.

Satin-like surface look. Smooth and velvety to the touch.

The resulting surface has a medium degree of reflection.

The final appearance of the surface is highly reflective, almost mirror-like.

-----  
In printing, colour of the products may differ slightly from actual, pictures are only for reference.

# Product Guide

## COLOUR VARIATIONS

V1 EVEN

The least amount of shade variation attainable.

V2 LIGHT

Light to moderate shade variation within each carton.

V3 MEDIUM

Medium to high shade variation within each carton.

V4 STRONG

Very high shade variation within each carton.

## INDICATIONS FOR USE

WALL TILES

FLOOR TILES

## SUGGESTED APPLICATIONS

DOMESTIC PURPOSE

Residential areas, hotel rooms, bathrooms

LIGHT COMMERCIAL TRAFFIC AREA

Indoor public areas subject to medium pedestrian traffic such as restaurants, bars, offices, shops, hotel public areas, convention rooms.

INDUSTRIAL TRAFFIC AREA

Indoor public areas subject to heavy pedestrian traffic such as airports, railway and underground stations, shopping malls, schools, museums and libraries, hospitals, banks and public offices, car showrooms, sport centers, hotel lobbies.

OUTDOOR

Outdoor public environments subject to medium pedestrian traffic such as outdoor terraces, stairs, corridors, raised paving, private garden, swimming pool and wellness areas.  
Always check the slipperiness characteristics according to the intended environment, in conformity with applicable regulations or laws.

HEAVY COMMERCIAL TRAFFIC AREA

Industrial floors such as warehouses, deposits, factories.

FACADE

Ventilated façade, low and high rise.
