# RAK CERAMICS

## Focused on ceramics' expertise

RAK Ceramics is one of the largest ceramics' brands in the world. Specialising in ceramic and gres porcelain wall and floor tiles and sanitaryware, the company has the capacity to produce 123 million square metres of tiles and 5 million pieces of sanitaryware per year at its state-of-the-art plants across the United Arab Emirates, India and Bangladesh.

Founded in 1989 and headquartered in the United Arab Emirates, RAK Ceramics serves clients in more than 150 countries through network of operational hubs its in Europe, Middle East and North Africa, Asia, North and South America and Australia. Across global operations the company employes approximately 12,000 staff from more than 40 nationalities. RAK Ceramics is a publicly listed company on the Abu Dhabi Securities Exchange in the United Arab Emirates and as a group has an annual turnover of approximately US\$1 billion.

## Forged in the mountains of Ras Al Khaimah

RAK Ceramics was established in Ras Al Khaimah in 1989 by H.H. Sheikh Saud Bin Saqr Al Qasimi, member of the Supreme Council and Ruler of Ras Al Khaimah, who aspired to have the best machinery, latest technology, and to produce the best products possible for sale in the world.

1991 - RAK Ceramics first factories

## **We play our role for a better environment and society**

Sustainability in every sphere of business is one of the main elements of RAK Ceramics mission statement. The company is committed to practicing environmental stewardship throughout its manufacturing chain – from product design and efficient operations processes – and to playing an active role in building a better community by enhancing the surrounding environment. Organization's activities improve energy efficiency, reduce pollution, enhance biodiversity and improve the quality of life for both people in the communities it operates in and for its workforce. It recycles natural raw materials to help conserve natural resources and adopts clean development mechanism (cdm) projects to reduce carbon emissions during the manufacturing process.

RAK Ceramics is the first ceramics manufacturing company in its region to produce a global reporting initiative (gri) sustainability and corporate social responsibility (csr) report, based on the latest gri-gr4 guidelines. RAK Ceramics is a founding member of Emirates Green Building Council, which supports the development of sustainable buildings in the UAE.

## The world's leading ceramics lifestyle solution provider

RAK Ceramics helps architects and interior designers create icons and build marvels. It provides sustainable materials that inspire ideas, shapes and hues designed to freely express any style. Unique and inspiring products that realistically resemble natural materials, with unlimited choice.

RAK Ceramics gives porcelain perfection and limitless imagination. Its passion and expertise combined with a careful attention to details enables it to provide designers and end users with a wide range of integrated ceramics solutions, allowing their freedom to be creative and plenty of room for imagination.

## Find us on BIMobject

BIMobject is the global digital marketplace for the construction industry, connecting building designers with building product manufacturers worldwide. All the products in the RAK Ceramics bathroom & surfaces category are showcased on BIMobject via a dedicated brand page. Scan the QR code below to view our BIMobject site and find out more about our offer!

## Explore our dedicated page on Archiproducts

Archiproducts is the world's largest source of information on brands, products and projects in the architecture and design landscape, accessed by millions of architects, designers, home-owners, manufacturers and resellers worldwide. RAK Ceramics is present on Archiproducts with its full range of bathroom & surfaces products and solutions, along with downloadable still life imagery, 3D files and product information to find out everything you need to know about our offer. Take a look at our dedicated page on Archiproducts by scanning the QR code below!

# Tiles

**Exquisite surfaces to enhance and decorate any living space**

Ceramic solutions made with new technological processes offering impactful visual and sensory characteristics. Natural, structured and polished materials of great aesthetic value to provide architects and interior designers the perfect solution for their contemporary design needs. Surface effects coming from the most precious materials in nature to embellish any indoor or outdoor environment. Thanks to the latest technology used in the tiles manufacturing process, there are no limits to the application possibilities, opening up perspectives in the field of major projects, both residential and commercial.

## Innovation and wide range

Innovation is the heart of RAK Ceramics philosophy and the company is a pioneer in introducing hi-tech innovations that are a breakthrough in the industry and a world leader in the production of ceramic and porcelain tiles ideal for use of indoor & outdoor spaces for wall and floor coverings for residential, retail and industrial projects.

A wide range of technologies are used at the state-of-the-art plants including big slabs pressing technology, advanced digital printing technology for industrial decoration & effects, translucent, double & triple charged feeding systems, digital soluble salts, thermal resistant komfy glaze, slim, anti-microbial, glow in the dark, and other advanced technologies.

RAK Ceramics is known for the wide product range and size range and for its ability to produce bespoke ranges for both small and large scale projects, enabling its clients to bring their idea to life.

## Quality makes us different

RAK Ceramics was the first company in United Arab Emirates being awarded with **ISO 9001 certification** by internationally recognized UK certification body “CICS” (Ceramic Research Institute Certification Scheme) for ceramics tiles and sanitary wares. Bureau Veritas Certifications verified the implementation of RAK Ceramics’ quality management system and certified the company in compliance with the requirements of **ISO 9001:2015** with the scope covering the design, development, production and supply of ceramics and porcelain floor and wall tiles, slabs and vitreous china sanitary wares.

Bureau Veritas Certifications also certified RAK Ceramics for **ISO 14001:2015 Environmental Management System**.

RAK Ceramics manufactures ceramic tiles according to the latest version of ISO 13006 and/or EN 1441 standards with equivalent ANSI A137.1 American national standard specifications for ceramics tiles.

Its Testing Laboratory is operating in accordance to **ISO/IEC 17025** accredited by NATA (National Association of Testing Authorities, Australia).

Being a corporate member of EGBC (Emirates Green Building Council), RAK Ceramics supports the promotion and development of sustainable buildings in United Arab Emirates.

# Technologies

# INNOTECH - RAKCERAMICS LAB

Antibacterial solution for healthier environment

Antislip technology for indoor and outdoor application

Technical and versatile surfaces suitable for any kind of usage

Surface capable to absorb and repel heat or cold according to individual needs

Perfectly creating 3D structures & patterns by giving surfaces textural realism

# INNOTECH - RAKCERAMICS LAB

Sustainable surfaces and designs made up to 95% of recycled materials

Extra matt surface with no glossy

Body through stone and marble veining

Backlighting high tech

High definition structures using digital technology

## Production Technology

**Glazed Porcelain**  
Ideal for flooring in residential and light commercial context

**Full Body Porcelain**  
Ideal for all floors, even with heavy traffic

## Surfaces

Every technical and aesthetic requirement will meet with a customised response from a range rich in surface finishes.

Polished

Lappato

Honed

Satin

Matt (smooth)

Matt (light structure)

Matt (heavy structure)

Glossy (smooth)

Glossy (light structure)

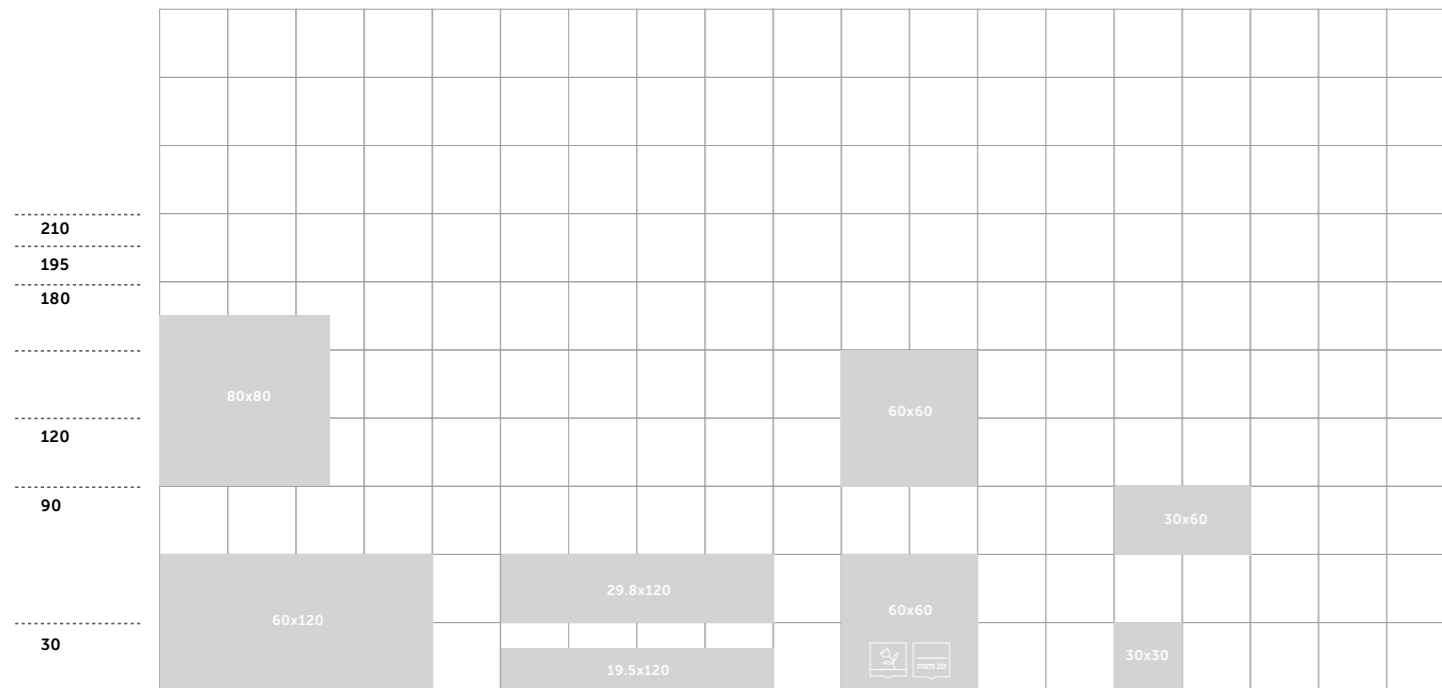

Glossy (heavy structure)

## Sizes

The most versatile choice of sizes means that every idea can evolve into a concrete and functional project

### Porcelain Tile

### MAXIMUS MEGA SLAB

## Thicknesses

From the residential to the light commercial sector and heavy traffic commercial areas, RAK Ceramics' range of thicknesses can cover any utilisation and end-use of the product. An exhaustive range designed to respond to all planning requirements.

### High thickness

Thin, in glazed porcelain, and double-firing. Ideal for renovations: It fixes to the existing surface without demolishing easy to cut, drill and handle lower environmental impact it maintains the technical characteristics of porcelain and double-fired tiles

### 6mm

In full body porcelain, the 12 or 14 mm is designed for stresses and heavy loads.

# Solutions

# Facade substructure systems and components.

## The Ventilated Curtain Walls System (VCWS)

A ventilated curtain wall is a facade system composed of several layers, in which the supporting external wall is provided with a layer (cladding) that offers protection against the weather. The cladding can be made from a wide variety of materials: ceramic, metal, fibre cement, composite panels, natural stone etc. The substructure attaches this façade cladding to the solid outer wall of a building while leaving a gap between the two.

Ventilated Curtain Walls are acknowledged as one of the most sustainable, cost-effective, and technologically advanced facade systems. On top of their outstanding structural and physical advantages, VCWS offer architects a virtually unlimited range of possibilities for creating striking designs.

This section presents two VECO Facade Substructure Systems used as fastening options for Ceramic Panels.

**VECO-A-2000** - Invisible Fastening with Under-cut Anchors

**VECO-A-1020** - Visible Fastening with Stainless Steel Clips

# VECO-A-2000

## Invisible Fastening with Under-cut Anchors

System: This system is used as a horizontal mounting system for invisible facade fastenings in combination with under-cut anchors.

Type of cladding: Large and small format Ceramic panels

Type of fastening: Invisible fixation with under-cut anchor

Mockup of Ceramic Panels installed using GIP VECO-A-2000 Substructure System

Vertical Aluminium Substructure with L-Profiles and Horizontal Agraffe Profile

This system is used as a horizontal mounting system for invisible facade fastenings in combination with under-cut anchors.

VECO-A-2000 system components are made from an aluminium alloy of the type EN-AW-6063T66 and are supplied in a variety of sizes to meet the specific static and structural requirements of the project.

# VECO-A-2000

## Invisible Fastening with Under-cut Anchors

### Substructure Components

1 - Thermo-Stop plates are placed to prevent contact between the brackets and the wall of the building.

2 & 3 - VECO-A system brackets are made from an aluminium alloy of type EN-AW-6063T66 and are supplied in a variety of sizes to meet the specific static and structural requirements of the project. The brackets can be used universally as fixed point or sliding point fastenings. Using the corresponding components, the length of the bracket is also infinitely adjustable and can therefore be adapted to the tolerances of the external wall of the building.

4 - Wall Anchors: Mechanical Anchor to fix the brackets to the wall substrate.

5 - Vertical Profiles :

L-Profile from Extruded Aluminium Alloy EN AW-6063T66 (used in central supports & connection applications)

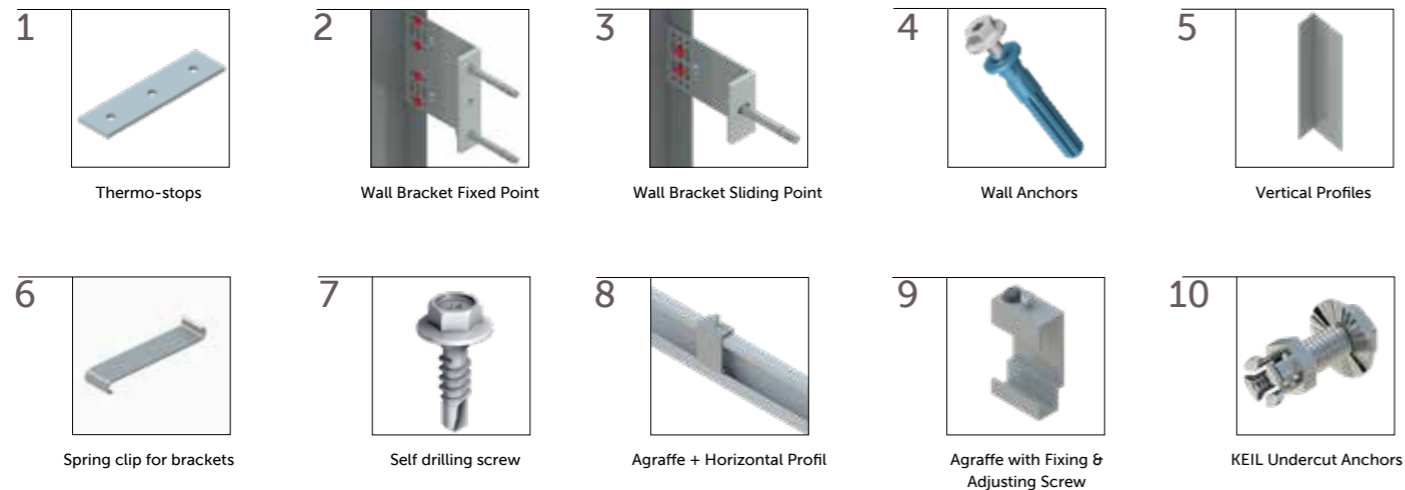

T-Profile from extruded Aluminium Alloy EN AW-6063T66 (used in area of joints)

6 - Spring clip made from spring steel 1.4310 used to aid installation

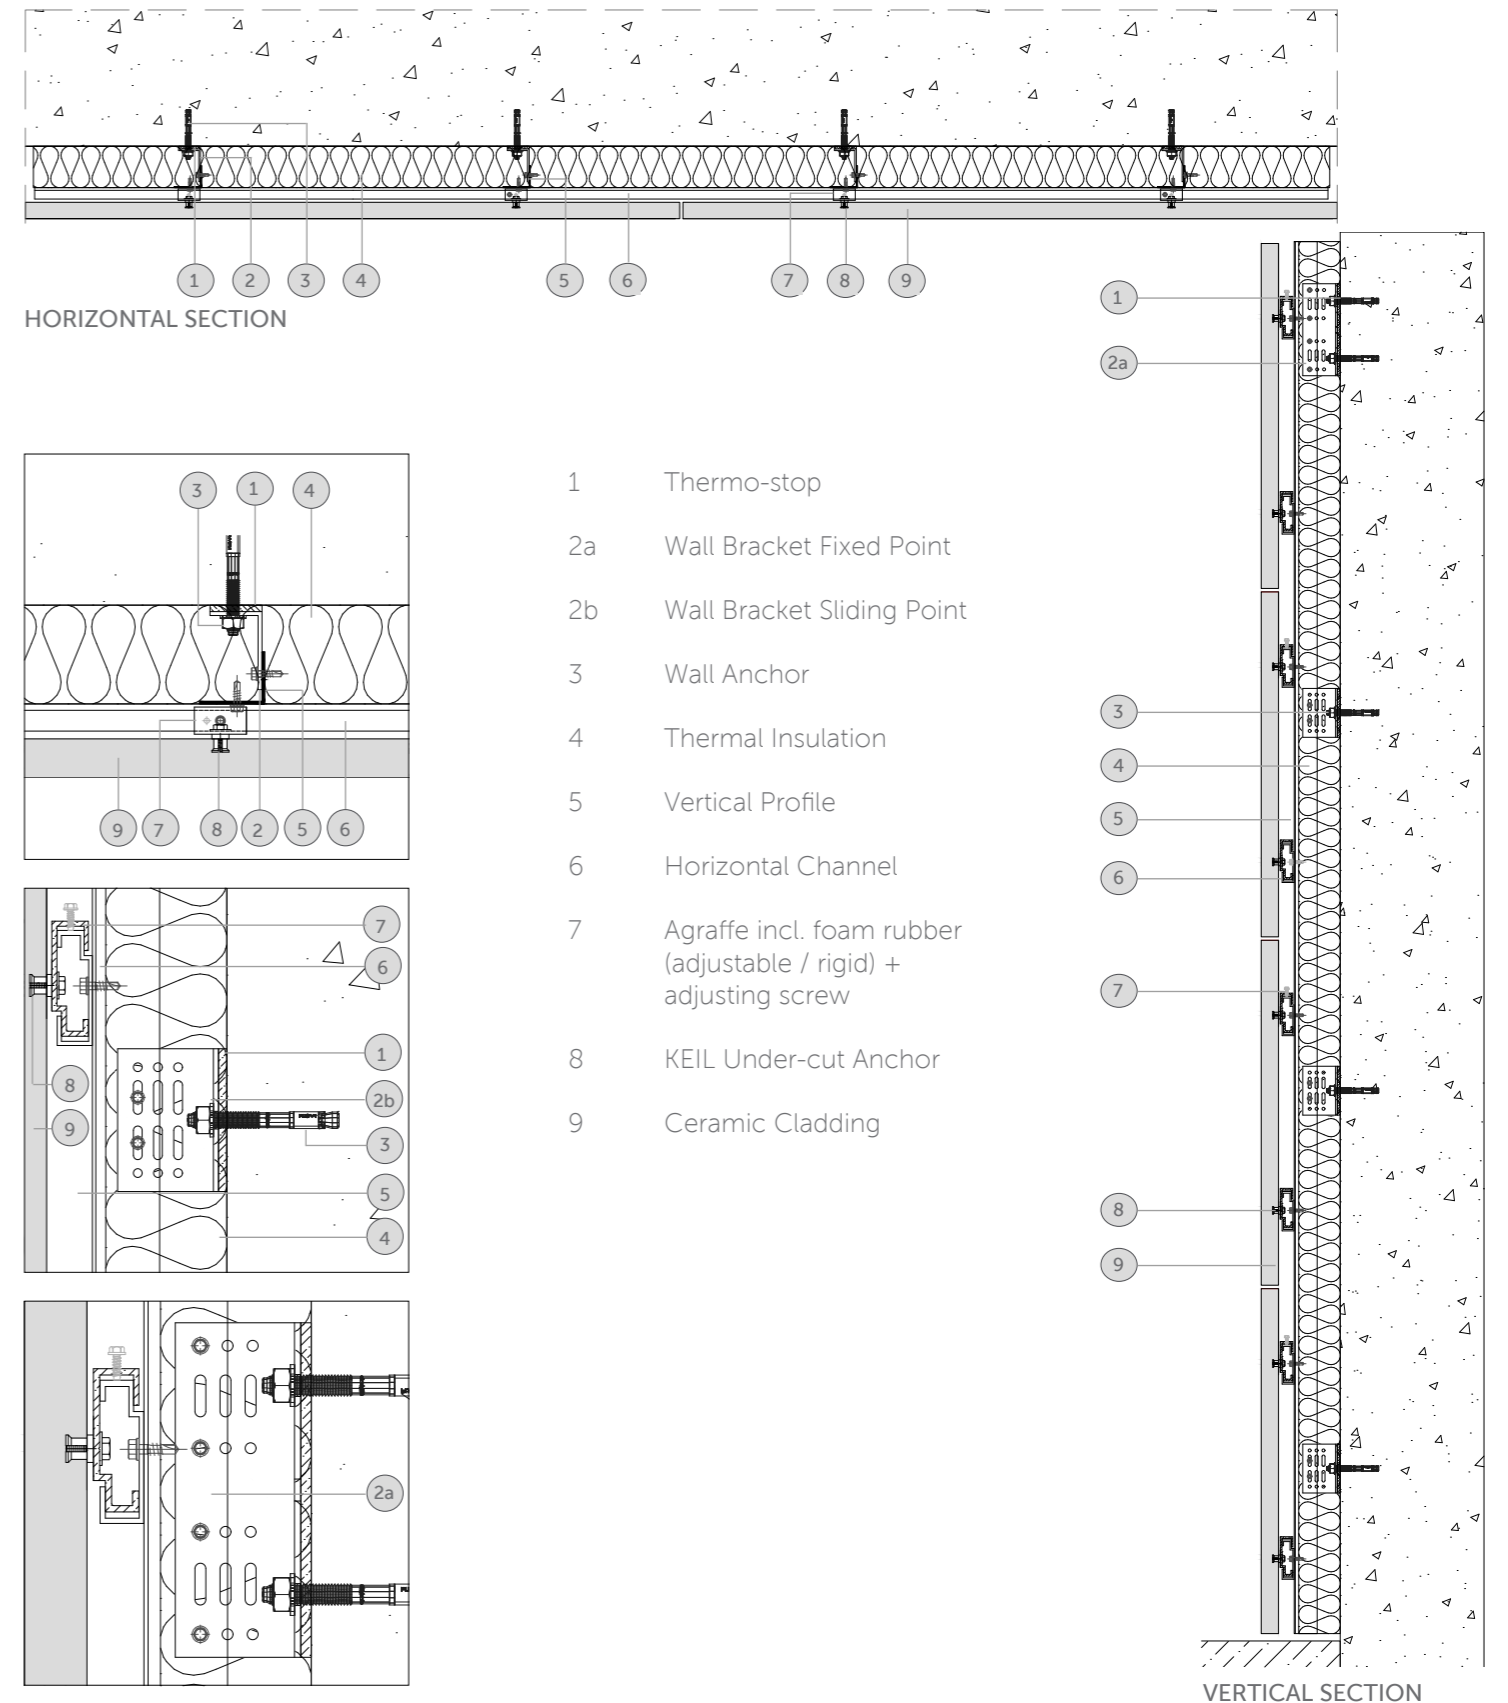

7 - Self Drilling Screws: Self drilling screws made from stainless steel A2 and A4 for fastening of horizontal profiles to brackets and vertical profiles

8 & 9 - There are 3 types of Agraffes: (Rigid)/(Adjustable)/(Adjusting +Fixed). The components used with them are adjusting screws, self drilling screws and self-adhesive foam rubber.

10 - The KEIL undercut anchor for the hidden attachment of thin panels is made from stainless steel. Its geometry which matches the KEIL undercut drill hole, guarantees a positive locking attachment free from expansion pressure in all panel materials from a panel thickness of 6mm onwards. Different insertion depths are possible depending on the thickness of the panel.

# Dry laying on grass

Easy to install and can be freely repositioned.  
Ideal for: Gardens, gazebos, walkways.

## Installation tips

- 1- Remove the soil below the area where the sheet will be laid to a thickness of about 5-6 cm
  - 2- apply gravel to a thickness of about 3-4 cm and compact the foundation
  - 3- Rest the sheets - with at least 1 cm of gap - on the gravel bed and use a rubber hammer to eliminate any unevenness.
- Warning: This system cannot be installed in the case of vehicle traffic and/or high dynamic loads.

### LAYING DIRECTLY ON GRASS

laying with closed joints (A)

laying with open joints (B)

The top of the tile should not project above the level of the grass

# Installation on gravel and sand

Easy to install and can be freely repositioned.

Ideal for: gardens, patios, courtyards, pedestrian walkways, beach resorts, perimeter areas in pools.

## Installation tips

- 1- Compact the level of the resting layer (sand or gravel)
  - 2- Lay the sheet on the bed of gravel or sand, maintaining a minimum gap of 1 cm or wider
  - 3- Use a rubber hammer to eliminate any unevenness
  - 4- Fill in the joints between the sheets with gravel or sand to provide greater stability to the surface
- Warning: The system cannot be installed in the case of vehicle traffic and/or high dynamic loads.

LAYING ON GRAVEL ON TOP OF SOIL BASE

# laying as raised paving

Easy to install and can be freely repositioned.  
Ideal for:

## Installation tips

- 1- Check that the substrate is flat, firm, rigid and able to support the weight of the paving without deformation.
- 2- choose suitable pedestals.
- 3- Give the surface of the paving a suitable gradient to ensure effective stormwater drainage
- 4- Place the polypropylene pedestals straight on top of the waterproofing membrane and fit the slabs on them

## MAXIMUS SPECIAL EGDES

### Choosing the right edge for your countertop

In any interior design project it is often the details that set it apart, and choosing your countertop edge is not a detail you want to overlook.

The edge can complete the style of your dream kitchen or bathroom.

Maximus standard and special edges are the finishing touch to your countertop installation.

## RAK E-System\*

RAK E-System is a worldwide exclusive by RAK Ceramics. It's the ideal and innovative solution to the current needs of designers who need to combine the aesthetics of a natural looking product with the versatility of porcelain slabs.

Thanks to its innovative and high performance materials, Maximus slabs can be easily processed to obtain glossy or matt thick edges, just gluing 2 overlapping slabs (14.5mm+14.5mm) according to the standards of natural stone processing.

\*RAK E-System is only available for UNI

## Concrete

The ultimate expression of minimalism

RAK Ceramics concrete collection makes a powerful statement with its sheer simplicity. No fuss, no frills, just pure perfection. With its neutral colour and natural texture, the concrete-look tiles are the ideal choice in creating a minimalist look and feel.

It is a versatile collection that suits well with any settings, either with a contemporary or minimalist mood, or in residential contexts or contract industry.

## Wood

Be inspired by wood effect tiles

Natural-looking tiles are one of the key trends for indoor and outdoor floor and wood is one of the most popular choice thanks to its versatility and beauty. Combining the aesthetic quality of natural timber with the durability of porcelain tiles, wood effect tiles are the perfect option when replacing a floor in a renovation project or laying a new floor in a newly built property, as it helps in creating your own personal style.

Parquet floor tiles can give any room the elegant look of hardwood, in an eco-friendly new way. It's waterproof, highly resistant to scratches and chemicals, easy to clean and resistant to heat and frost. It definitely looks like a good idea!

## Metal / Resin

The boldness of metal, the charm of resin

A celebration of the dramatic effects and contrasting colours created during the ageing process of raw metal. With a bold and arresting appearance, our Metal collection is perfect for wall and floor, in both urban and industrial settings. The range is completed by spatulated resins, unique in their kind thanks to delicately wavy and irregular textures. An elegant choice, which gives a strong character to the rooms, combined with practicality, hygiene and maximum durability.

## Stone

No better way to create a relaxing environment

RAK Ceramics reinterprets the ancestral charm of stone and transforms it to one of the most preferred material in contemporary architecture.

Solid, durable and extremely versatile, the stone-look tiles have special features and highly attractive visual impact. A traditional mood that is able to define interior design projects with a modern appeal. RAK Ceramics' stone collection is inspired by various types of stone existing in nature and is the ideal choice to create a particularly welcoming atmosphere that suits a sophisticated environment, giving a sensation of wellness and relaxation.

## High Performance Technical Products

RAK Ceramics has always been at the forefront of Technical Gres Porcelain tiles.

Thanks to the updated technology, RAK Ceramics opens up new perspectives in the field of major projects, both for residential and commercial, and reaffirms a brand of absolute value.

## HIGH PERFORMANCE TECHNICAL PRODUCTS

With a dedicated production technology able to deliver the most modern high-performing solution in the handling of powders, making double or triple loading possible, a new variety of full body porcelain stoneware with unique characteristics and inimitable performances are created.

This modern loading system can apply materials of different compositions and sizes: spray-dried powders, glaze, granules, soluble colors and flakes that can be deposited both individually and in mixtures; creating natural, structured, and polished materials of great aesthetic value. The result is a full range of materials with extraordinary natural and structured characteristics.

This collection is one of the most modern high-performing variety of porcelain tiles with unique characteristics and limitless applications.

Natural, structured and polished materials of great aesthetic value to provide architects and interior designers the perfect solution for their contemporary design needs.

## Outdoor

Give your outdoor spaces a new look. Sustainable and adaptable, porcelain tiles are the ideal choice to design or revamp gardens, patios, terraces, driveways or pool areas. The different installation possibilities allows the material to blend in with its surrounding landscape.

You can choose a 20mm solution, an antislip normal thickness tile, a special antislip A+B+C product. Imagine your outdoor space.

## THE SLABS & THE COUNTERS BY MAXIMUS

Versatile and simply beautiful, the big slabs and countertops revolutionize the design and architecture world by opening up new perspectives in tiles application that were previously unimaginable. Reduced grouts between elements provide a new way to maximize available space by creating elegant visual effects through surface continuity, making rooms appear more spacious and homogeneous. All the continuous surfaces are designed for any type of application and provide creative flexibility and high technical and aesthetic performances. Heat resistant, recyclable, light weight, durable and easy to clean, the best answer to the most challenging architectural and interior design needs.

## MAINTENANCE AND CLEANING OF TILES

Maintenance of ceramic and porcelain tiles on dry surfaces is relatively easy. RAK Ceramics tiles are highly scratch and stain resistant.

- By regularly sweeping the floor, you can help avoid scratches that small pebbles or sand can create.
- Make it a habit to always wipe the soles of your shoes on a mat before entering the house. Thoroughly wipe up any spills using plain warm water.
- While they are not likely to stain your ceramic tiles, spills may stain the grout between the tiles and if they are left to sit for too long, may also stain the actual tiles.
- Plain water is the ideal cleaner because it leaves no residue if you dry the surface of the tiles thoroughly after cleaning.
- If tiles are left wet after cleaning, there may be some unsightly mineral residue after the water dries, but this can easily be removed by spot cleaning.
- If stains resist cleaning with water alone, you can use a mild acidic solution, such as white vinegar. Use it highly diluted and rinse with plain water then dry.
- As food stains are acidic in nature, try using a mild alkaline solution.
- Use common detergents sparingly, rinse with plain water and dry thoroughly.

## MAINTENANCE AND CLEANING OF MAXIMUS

Maximus products are non porous (due to their high quality raw materials, stringent production parameters and state of the art technology), hence any dust or deposited waste cannot penetrate the surface. For most cases only a damp cloth is sufficient for cleaning. Regular cleaning highlights the aesthetic features of the surface and gives it exceptional shine. For highly aggressive cleaning caused by some common food and substances follow the table below.

TYPE OF STAIN	CHEMICAL PRODUCT	EXAMPLE
Grease	Alkaline - Solvent	Detergent
Oil	Solvent	Ammonia
Ink	Oxidant - Solvent	Alcohol
Rust	Acid	Hydrolic acid
Lime	Acid	Descaling products
Cement	Acid	Hydrolic acid
Wine	Alkaline	Ammonia or Bleach
Coffee	Alkaline - Solvent	Ammonia or Bleach
Rubber	Solvent	Alcohol
Plaster	Acid	Hydrolic acid
Candle wax	Solvent	Alcohol
Iodine	Oxidant	Bleach
Blood	Oxidant	Bleach
Ice cream	Alkaline	Detergent
Resins	Solvent	Alcohol
Fruit juices	Oxidant	

Disclaimer: The aim of this manual is to offer helpful suggestions about handling and maintaining Maximus mega slabs. Due to nature of sintered ceramic material, it is highly advisable to consult an expert for these purposes. RAK Ceramics cannot be held responsible for any damage resulting from using the information and suggestions contained in this technical manual.

## RAK CERAMICS CARE EXCLUSIVE POST INSTALLATION CLEANING SERVICE

We have collaborated with Fila, a leading company in cleaning, protection and maintenance of ceramic surfaces to offer an exclusive cleaning service to address our customers post installation concerns.

Cleaning after laying is of vital importance as a lot of unseen debris and reactive chemicals can affect the visual appearance of the ceramic material. With this new service, our customers can take advantage of Fila's professional on-site consultation. For more info please visit [www.rakceramics.com](http://www.rakceramics.com)

FILA IS A RECOMMENDED PARTNER OF RAK CERAMICS

## TILE-LAYING RECOMMENDATIONS

All RAK Ceramics products are subject to size and shade variations. Please check the size, batch number, caliber, tone, choice, color, quality of the pieces before the installation, as no claims will be accepted once the tiles are installed.

Place some tiles on the floor - 2 or 3 sqm - and check the overall technical and aesthetic characteristics with care and check if there is enough product to finish the work.

Manufacturer's responsibility is only limited to replacement of defective material if any, prior to fixing of tiles and we will not entertain claim of any nature after the tiles are installed.

Therefore, if any issue is found on the delivered product, the contractor for installation or the client should not install the tiles. The issue should be communicated to RAK Ceramics for investigation and further action for resolution as required.

The substrate must be a compact cement bed. Levelling system ensures flatness between tiles avoiding movements during the mortar setting. This reduces the time for the ceramic laying obtaining a perfect lippage-free finish. Avoid movements between the tiles due to the mortar setting.

The width of grout joints must be established by the installation supervisor, unless grout widths are regulated by national laying standards. The grout colour should be selected according to the colour of the tile. We recommend to select a matching colour. Before using fine-grain coloured grout on lapped, polished or brushed products, always test it. If the pigment is very adhesive, it may be very difficult to remove.

We recommend to lay the tiles by using suitable adhesives for each kind of product and surface. As general rule, tiles must be installed in the same position. The minimum joint is 2 mm for rectified tiles, although we suggest a higher joint for big size products. After grouting, remove any excess product as quickly as possible by repeatedly washing the area with a sponge and water.

Steps to follow 1. First, set the tool to the scale according to the ceramic thickness. 2. Introduce the crossheads and continue laying the adjacent tiles. 3. Put the wedges in the crosshead manually. 4. Tighten the wedges with the pliers to level the pieces. 5. Allow for setting for the time recommended by the manufacturer of the adhesive cement. 6. Remove the crossheads. Hit the crosshead with a rubber mallet or with your foot in the direction of the joint. Do not hit the wedges.

The company will not accept any claim if this is due to the problems caused by not following these suggestions and instructions.

LATICRETE IS A RECOMMENDED PARTNER OF RAK CERAMICS

## Suggested equipment

### HANDLING EQUIPMENT

Aluminum Parallel profile with crossbars and Suction Vacuum suction cups with vacuum gauge

Tile Cart Trolley

Double Suction Cups

Modular Work Bench BM180

Modular Work Bench BM180 BM180 Plus ( Perfect Workstation for large format tiles up to 160cm width)

### CUTTING AND DRILLING EQUIPMENT

Compass device with suction cups for Circular Cuts

Free cut guide with complete outfit Max. Cut of length – 156 cm

Free Cut Extension

Cutting off pliers for tile/slabs

Diamond polishing pad

Diamond for edge and side polishing

Diamond Blades for simultaneous cutting and grooving

### INSTALLATION AND LEVELLING EQUIPMENT

Compact Vibrator or Tile Beater

RLS 3D Clips for tiles

Wedges (for Anti-Chipping / Anti-Scratching preventing platforms)

Adjustable pliers for wall and floor covering

Low-speed mixer

Rubber Grout floats

Slant ridge notched trowel

Diamond for edge and side polishing

### CLEANING AND MAINTENANCE

Brooms

Floats with abrasive pads

ICONS

COLOUR VARIATIONS

V1 EVEN

The least amount of shade variation attainable.

V2 LIGHT

Light to moderate shade variation within each carton.

V3 MEDIUM

Medium to high shade variation within each carton.

V4 STRONG

Very high shade variation within each carton.

INDICATIONS FOR USE

WALL TILES

FLOOR TILES

SUGGESTED APPLICATIONS

DOMESTIC PURPOSE

Residential areas, hotel rooms, bathrooms

LIGHT COMMERCIAL TRAFFIC AREA

Indoor public areas subject to medium pedestrian traffic such as restaurants, bars, offices, shops, hotel public areas, convention rooms.

INDUSTRIAL TRAFFIC AREA

Indoor public areas subject to heavy pedestrian traffic such as airports, railway and underground stations, shopping malls, schools, museums and libraries, hospitals, banks and public offices, car showrooms, sport centers, hotel lobbies.

OUTDOOR

Outdoor public environments subject to medium pedestrian traffic such as outdoor terraces, stairs, corridors, raised paving, private garden, swimming pool and wellness areas. Always check the slipperiness characteristics according to the intended environment, in conformity with applicable regulations or laws.

HEAVY COMMERCIAL TRAFFIC AREA

Industrial floors such as warehouses, deposits, factories.

FACADE

Ventilated façade, low and high rise.

R9

indicates a normal grip with an inclination plane from 3° to 10°

R10

indicates a medium grip with an inclination plane from 10° to 19°

R11

indicates a high grip with an inclination plane from 19° to 27°

CLASSIFICATION	TYPICAL APPLICATIONS	MEAN CRITICAL ANGLE VALUE
Class A	Barefoot, but mainly dry aisles and walkways, dry changing areas.	≥ 12°
Class B	Shower rooms, pool surrounds, wet changing areas (plus all areas covered by Class A).	≥ 18°
Class C	Areas constantly under water, e.g. steps into pools, foot baths, inclined pool surrounds, Jacuzzis (plus all areas covered by Class A and B).	≥ 24°

In printing, colour of the products may differ slightly from actual, pictures are only for reference.

# Bathrooms

**Design solutions to create  
unique and charming bathroom  
environments**

Collections that are perfectly combinable with each other incorporating a product offer evolution focused on the dialogue between the different series.  
An invitation to be more imaginative and creative in the choice of products, materials, and finishes to achieve the full potential of any bathroom space.

## Latest technology and manufacture

RAK Ceramics is internationally recognized for the high quality of its sanitary ceramics. This quality comes from carefully selected premium raw materials that ensure a perfect finish of the products. Better ingredients, better sanitaryware!

At RAK Ceramics we are not just ceramic experts. We also manufacture seat covers, bathtubs, showertrays, furniture mirrors and accessories.

## Quality makes us different

RAK Ceramics was the first company in United Arab Emirates being awarded with **ISO 9001 certification** by internationally recognized UK certification body “CICS” (Ceramic Research Institute Certification Scheme) for ceramics tiles and sanitary wares. Bureau Veritas Certifications verified the implementation of RAK Ceramics’ quality management system and certified the company in compliance with the requirements of **ISO 9001:2015** with the scope covering the design, development, production and supply of ceramics and porcelain floor and wall tiles, slabs and vitreous china sanitary wares.

Bureau Veritas Certifications also certified RAK Ceramics for **ISO 14001:2015 Environmental Management System**.

Every phase of the RAK Ceramics sanitaryware production process counts on strict quality control procedures. The leadership in the GCC Region and the strong presence in several other international markets reflect our everyday efforts. Our internal Norms comply and exceed the international requirements in terms of quality and performance.

Its Testing Laboratory is operating in accordance to **ISO/IEC 17025** accredited by NATA (National Association of Testing Authorities, Australia).

## Global approvals & standards

RAK Ceramics Sanitaryware production is accredited with the world's most reputable certification entities. With national and international certifications for product and processes, RAK Ceramics not only complies to the requirements, but often exceeds the most stringent international standards. Our own severe water/air product testing is performed on the 100% of WC & Bidet production. Only complying products are labeled with our QC sticker: a seal of quality and performance!

CERAMICS

## Quality design for international tastes

RAK Ceramics product development has created a very wide range of products with carefully finished details and quality design to suit international tastes, incorporating the latest rimless technology.

Carefully designed and engineered with the aid of the latest 3D CAD softwares and prototyped with 5 axis CNC machines, RAK Ceramics Sanitaryware range has the perfect solution for your bathroom, whatever you have imagined.

## Rimless technology

RAK Ceramics delivers the ultimate in technology for bathroom suites. Based on similar design specifications to sanitaryware in hospitals and medical centres, RAK Ceramics Rimless water closets allows you to experience the same high standards of hygiene in your own home.

RAK Ceramics continues to set new standards of hygiene and water efficiency in the sanitaryware industry, with uniquely engineered water flushing systems that effectively remove waste, helping to keep bathrooms fresh and hygienic.

### **WATER SAVING**

Using just 4 litres for the full flush and 2.5 litres for the half flush, water usage is reduced by a third.

### **HYGIENIC AND EASY TO CLEAN**

The water closets have no rims to harbour germs, making cleaning quick, easy and more hygienic.

### **SILENT FLUSH**

Rimless technology allows a faster and more silent flush.

### **EFFICIENT DESIGN**

Design and efficiency can be successfully combined. Water flows vertically and horizontally, before flushing the entire inner surface of the bowl, without splashing.

Rimless

## Updated ergonomics

Over the last 100 years, the average height of people in industrialized nations has increased approximately by 10 cm. To be innovative in design also means meeting the changes in population and their new needs in terms of ergonomics and comfort. RAK Ceramics design evolves together with human evolution.

## Hidden fixation systems

Our wall hung and back to wall products are benefitting from the collaboration with Fischer Group, one of the industry leaders. The use of the most innovative Fischer fixing systems, is allowing us design freedom on the ceramic, better aesthetics and more safety for the installer.

The Hidden Fixation System is comfortable and time saving, in fact one-man installation is made possible by the clip system that keeps the ceramic held up during the installation.

## RAK-Sanit A new standard for hygiene

RAK-Sanit solutions for your bathroom are produced with RAK-ProTeK, the innovative ceramic glaze developed to protect wash basins, toilets and urinals, to make them more hygienic and easier to clean. RAK-ProTeK, which is baked into the ceramic during firing, results to a smoother surface, unlike standard ceramic with irregular surface.

This feature allows the particles accumulating on the ceramic to easily slip away making cleaning more efficient and convenient.

The silver ions contained in this revolutionary glaze, kill 99.9% of bacteria in 24 hours and prevent the bacterial growth, in comparison to conventional ceramic glazing. RAK-ProTeK glaze has been tested by Artest laboratory from the Italian Ceramic district in Modena.

For more information, please scan the QR code below to view our RAK-Sanit dedicated brochure.

**RAK-FEELING**

# RAK-FEELING

Imagine your ideal bathroom where quality and harmony merge with functionality to give you the utmost comfort and then imagine it in colour. **RAK-Feeling** is the complete collection of shower trays and washbasins, water closets and bidet, made with innovative materials and coordinate colours to perfect your moments of relaxation in a total look ambiance.

# RAK-DES

RAK-Des is a new concept bathroom suite that pays tribute to the Bauhaus school by which it is inspired, on the occasion of the centenary of its foundation (1919). RAK-Des includes bowls and freestanding washbasins with the essential minimalist lines. The rectangular washbasins of this collection can be installed suspended, individually, or combined with the RAK-Joy vanities.

## WASH BASINS

# RAK-PETIT

RAK-Petit is the second chapter of the successful collaboration with Maurizio Scutellà. A transversal collection of small washbasins designed for architects and interior designers who address the theme of small spaces: with minimal shapes and small dimensions, RAK-Petit is perfect for small but special bathrooms and for furnishing elegant public spaces, freestanding washbasins for representative or public bathrooms.

## Design by Giuseppe Maurizio Scutellà

Giuseppe Maurizio Scutellà was born in Alcamo, Sicily. His collaboration with RAK Ceramics begins with RAK-Cloud (2018), a project that continues the creative thinking of the Italian designer and that integrates perfectly with his other projects such as the collection of lamps "Pirce" by Artemide (Good\_Design 2008, Red Dot Award 2009, IF Design Award 2010) and the "Metropolis" collection of crystal and ceramic tables by Tonelli Design. RAK-Petit is the second concept developed together with RAK Ceramics (2019).

"I like to talk with the soul of all my projects, discover its history and capturing the most hidden hues of its character, respecting its nature and embracing its languages. It is my way of approaching its magical essence and becoming its interpreter".

# RAK-VARIANT

Round, oval, square... what's the shape of your freedom? Feel free to design, free to explore new solutions for your bathroom project, free to imagine. RAK-Variant featuring countertop, drop-in and under counter washbasins. Different shapes and different sizes with or without tap bank. Made from high-quality ceramic in 5mm thickness.

## Design by Daniel Debiasi and Federico Sandri

Daniel Debiasi and Federico Sandri founded their own design studio in 2010 and work within various fields of design, ranging from objects to spaces. Multiple experiments and the relationship between manufacture and craftsmanship form the basis for a much broader thinking, where objects are always considered as part of a bigger picture. They have created work for Antoniolupi, Lema, Ligne Roset, Normann Copenhagen, Offecct, Rosenthal, Stelton, Villeroy & Boch among others. Many of their projects have received international design awards and are featured in publications worldwide. In addition to their work as designers, they regularly teach, hold workshops and lectures at various institutions including IUAV Venezia and Politecnico di Milano. Together with Rak Ceramics, Daniel Debiasi and Federico Sandri present the project RAK-Variant (2019).

## Waterless urinal

RAK-Venice is a urinal perfectly functioning with no use of water: we call it Waterless.

RAK Ceramic's Waterless system is unlike any other dry valve in the market, helping to: eliminate restroom odors, provide the most robust flow rate, make maintenance and clean up easier, and provide a more hygienic solution in the restroom. The maintenance of our Waterless system is easy and fast, the green visual indicator is made of biodegradable ingredients that inform when it's time to change out your cartridge (approx. 7500 uses).

## We play our role for a better environment and society

Sustainability in every sphere of business is one of the main elements of RAK Ceramics mission statement. The company is committed to practicing environmental stewardship throughout its manufacturing chain – from product design and efficient operations processes – and to playing an active role in building a better community by enhancing the surrounding environment. Organization's activities improve energy efficiency, reduce pollution, enhance biodiversity and improve the quality of life for both people in the communities it operates in and for its workforce. It recycles natural raw materials to help conserve natural resources and adopts clean development mechanism (cdm) projects to reduce carbon emissions during the manufacturing process.

RAK Ceramics is the first ceramics manufacturing company in its region to produce a global reporting initiative (GRI) sustainability and corporate social responsibility (CSR) report, based on the latest GRI-g4 guidelines. RAK Ceramics is a founding member of Emirates Green Building Council, which supports the development of sustainable buildings in the UAE.

### **FROM RESPONSIBLE SOURCES FSC® CERTIFIED**

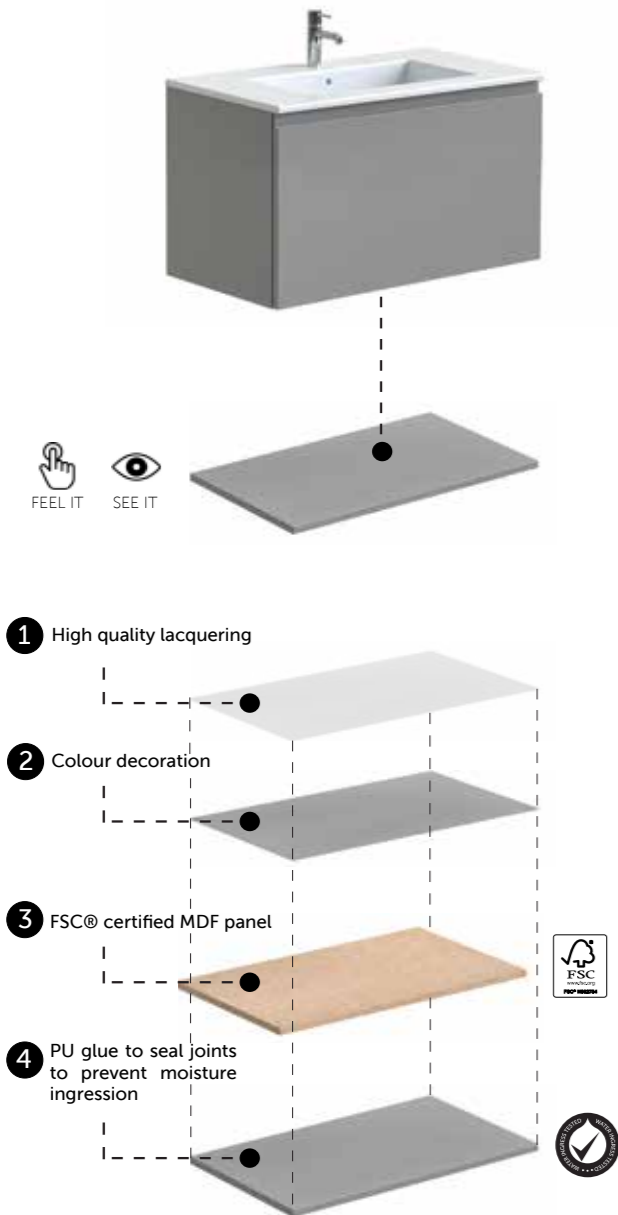

The RAK-JOY wooden furniture collection respects the environment and the life of the furniture itself. All particleboard and MDF used in the construction of this striking furniture collection comes from responsible sources FSC certified, respecting the forests, the people and wildlife who call them home.

For more information: [www.fsc.org](http://www.fsc.org)

MATERIALS

LAMILAK

LAMILAK is the new gloss material that exudes consistent quality and performance. The brilliant high gloss shine gives a striking smooth surface final appearance. To protect the environment, LAMILAK is produced from PET recyclable material.

TECHWOOD

TECHWOOD is the new wood effect material that gives the tactile impression of real wood. Revel in the touch and feel of its vibrant texture. To protect the environment, TECHWOOD is produced from polypropylene recyclable material.

# RAK-PLANO

RAK-Plano countertop surfaces combine elegance, durability and practicality, transforming your RAK-Joy or RAK-Joy Uno vanity unit into one of the most versatile accessories at the service of your design projects. Available in 3 different TECHWOOD finishes and in our innovative matt white RAKSOLID material. RAK-Plano is a one-piece vanity top, without joints that can be drilled and cut (if necessary) directly on site, allowing you the greatest freedom in positioning the washbasins and mixers.

# RAK-PLANO CUSTOMIZATION

RAK-Plano surfaces made of RAKSOLID, are easy to cut and drill during the installation. The cut can easily be carried out on site by the installer, with common wood tools. RAK-Plano gives you the possibility to install the washbasin and the faucets in your favorite position and offers you the chance to change your mind onsite (before drilling) and to revise your project if needed.

## SHOWER TRAYS

# RAK-FEELING SHOWER TRAYS

SHOWER TRAYS

**RAK-Feeling** is made of RAKSOLID, a durable material composed of a mixture of natural minerals and resins. The elegant matte finish with stone effect gives a distinctive feel to the shower area, as well as a pleasant to the touch and more anti-slip safety.

# VERSATILE INSTALLATION

RAK-Feeling shower trays can be installed flush to floor, semi-recessed or directly onto the floor.. RAK-Feeling products are ideal for both new buildings and renovations, thanks to the minimum dimensions of 5.8 cm required under the shower tray for the waste.

## INSTALLATION VARIANTS

FLUSH TO FLOOR

SEMI-RECESSED

ON THE FLOOR

## RAKSOLID DESIGN AND FUNCTIONALITY

ULTRA THIN: 3 CM THICKNESS

HYGIENIC AND BACTERIOSTATIC

SLIP RESISTANCE

LIGHT FASTNESS

CUSTOM

RESISTANT TO CHEMICAL PRODUCTS

GLAZED ON 4 SIDES

REPAIR

RAK-Feeling is only 3cm thin and its surface inhibits the growth of bacteria and fungi to ensure greater safety and hygiene. All the shower trays feature excellent resistance to chemical products. This is confirmed by the strictest chemical resistance tests required by the EN 14527 standard. They are not affected by exposure to light. This is confirmed by xenon arc lamp tests, which simulate sunlight on shower trays and verify the effects of ageing (EN ISO 4892 standard). Our RAKSOLID material meets the highest safety standards, being classified in DIN 51097 Class C (the highest achievable level of slip resistance). It prevents slipping on surfaces with an inclination angle of more than 24°. In the event of chips and scratches, shower trays can be restored to their original condition using a special repair kit.

**FLUSHING  
SYSTEMS**

## Can we save water in our bathrooms?

One of the easiest ways to save water is to install a toilet with a dual-flush cistern. Dual-flush cisterns let the user choose how much water to use when flushing the toilet and they are designed for wall-hung, back-to-wall and close coupled water closets.

RAK Ceramics flushing systems, allow you to choose using the full flush or the half flush, with different flushing volumes: 6 Liters for the full and 3 Liters for the half flush. The cisterns can also be adjusted to flush with a reduced full flush volume at 4.5 Liters.

For countries with limited water resources, RAK Ceramics has developed innovative water closets perfectly flushing with a reduced 3 Liters single flush.

By using a lower volume of water to flush the toilet you can dramatically reduce your annual water consumption.

### DUAL FLUSHING:

# RAK-ECOFIX

**RAK-Ecofix** Flushing systems by RAK Ceramics are the ideal solution for all types of hydro-sanitary systems. Invisible built-in flushing systems combine functionality and aesthetics, saving space in every bathroom. The new and elegant push plates integrate perfectly with any style and design of dual flush systems to reduce water consumption.

RAK-Ecofix not only offers limitless installation possibilities, but a flat designed range of push plates in 3 elegant finishes and 2 different designs. The push plate is the only visible part of the concealed cistern and is built for the water saving dual system flush in volumes 6-3 liters or 4.5-3 liters. Another possibility to move functionality and style into your bathroom.

Measurements

## SOLID WALL INSTALLATION

The concealed cistern can be easily fastened in front of or inside a solid wall and then brick lined.

## DRYWALL INSTALLATION

With a drywall system it is possible to create complete room-height prewalls or partitions.

RAK-Ecofix installation elements are suitable for solid constructions and for all drywall construction situations.  
تركيبات راك-إكوفيكس مناسبة للإنشاءات الصلبة وجميع حالات جدران الجبس.

### 12 cm wall-thickness

In the wall or in front of it, with flushing actuation from the front

### 8 cm wall-thickness

For thin walls or for space-saving installations, with flushing actuation from the front.

### Low-height situations

Special element height 82 cm, with top or front flushing actuation.
