RAK

CERAMICS

Building from the ground up

Founded in 1989 in Ras Al Khaimah, RAK Ceramics was shaped by a simple but demanding ambition: to build ceramics at a scale and quality that could compete with the world's finest. This compelled our founders to invest early in manufacturing, research and development, and technology. The location mattered. So did the climate, the geology, and a keen understanding of the way materials react to heat, distance, and time.

What grew out of this was a complex ecosystem that serves clients in 150 countries. Over the years, RAK Ceramics expanded its capabilities across tiles, slabs, and sanitary ware, building production facilities that could support both volume and precision. These capabilities have helped the company produce over 123 million square metres of tiles, 5 million pieces of sanitary ware in state-of-the-art plants across the United Arab Emirates (UAE), India, and Bangladesh.

This approach has been ingrained into 12,000 members of staff from 40 countries and continues to inform how RAK designs, engineers, and produces its surfaces today.

Form and substance

Too often, ceramics are discussed only as finishes. At RAK, the opposite is true.

As one of the world's largest ceramic manufacturers, the company operates across continents, with production facilities in the United Arab Emirates, India, and Bangladesh, alongside a presence that spans over 150 countries.

This scale helps us refine our products in terms of design and testing.

Our designers and engineers pay close attention to how surfaces are used, cleaned, worn down, and relied upon, which is why our innovations usually begin with practical questions.

How does a floor respond to extreme heat? How does light interact with large slabs? How do materials age in old family homes?

Perhaps that is why RAK Ceramics has remained a dependable partner to renowned architects, interior designers, developers, and homeowners.

It all boils down to one thing: build well and let the material do the work.

Our green thumb approach

At RAK Ceramics, sustainability is embedded in the way things are made, the way they are designed, the way we work, and who we call partners.

Design decisions, material choices, and manufacturing processes are calibrated to use less energy, limit emissions, and reduce waste. Recycling is built into the system, alongside cleaner production methods that actively cut carbon output. The impact extends beyond production. RAK Ceramics supports local ecosystems and improves everyday conditions for the communities and workforce connected to the company.

RAK Ceramics was among the first in its region to publish a sustainability and corporate social responsibility (CSR) report aligned with Global Reporting Initiative (GRI) standards, setting a clearer benchmark for accountability.

As a founding member of the Emirates Green Building Council, the company remains part of a larger shift towards more responsible building practices.

The RAK benchmark

RAK Ceramics was among the first in the region to align with globally recognised certification systems. The company's processes are shaped by rigorous international standards, from ISO 9001 for quality management to ISO 14001 for environmental responsibility. These credentials are testament to how thoroughly our products are designed, tested, and produced.

Our manufacturing operations adhere to established benchmarks such as ISO 13006 and EN standards, with equivalence to ANSI specifications, ensuring consistency across markets. Behind this, an ISO/IEC 17025-accredited laboratory oversees testing with precision, reinforcing reliability at every stage.

There is also a broader commitment at play. As a member of the Emirates Green Building Council, RAK Ceramics participates in shaping conversations around sustainable construction in the region.

In the end, it's less about certification and more about the trust RAK Ceramics has established over clients and partners alike.

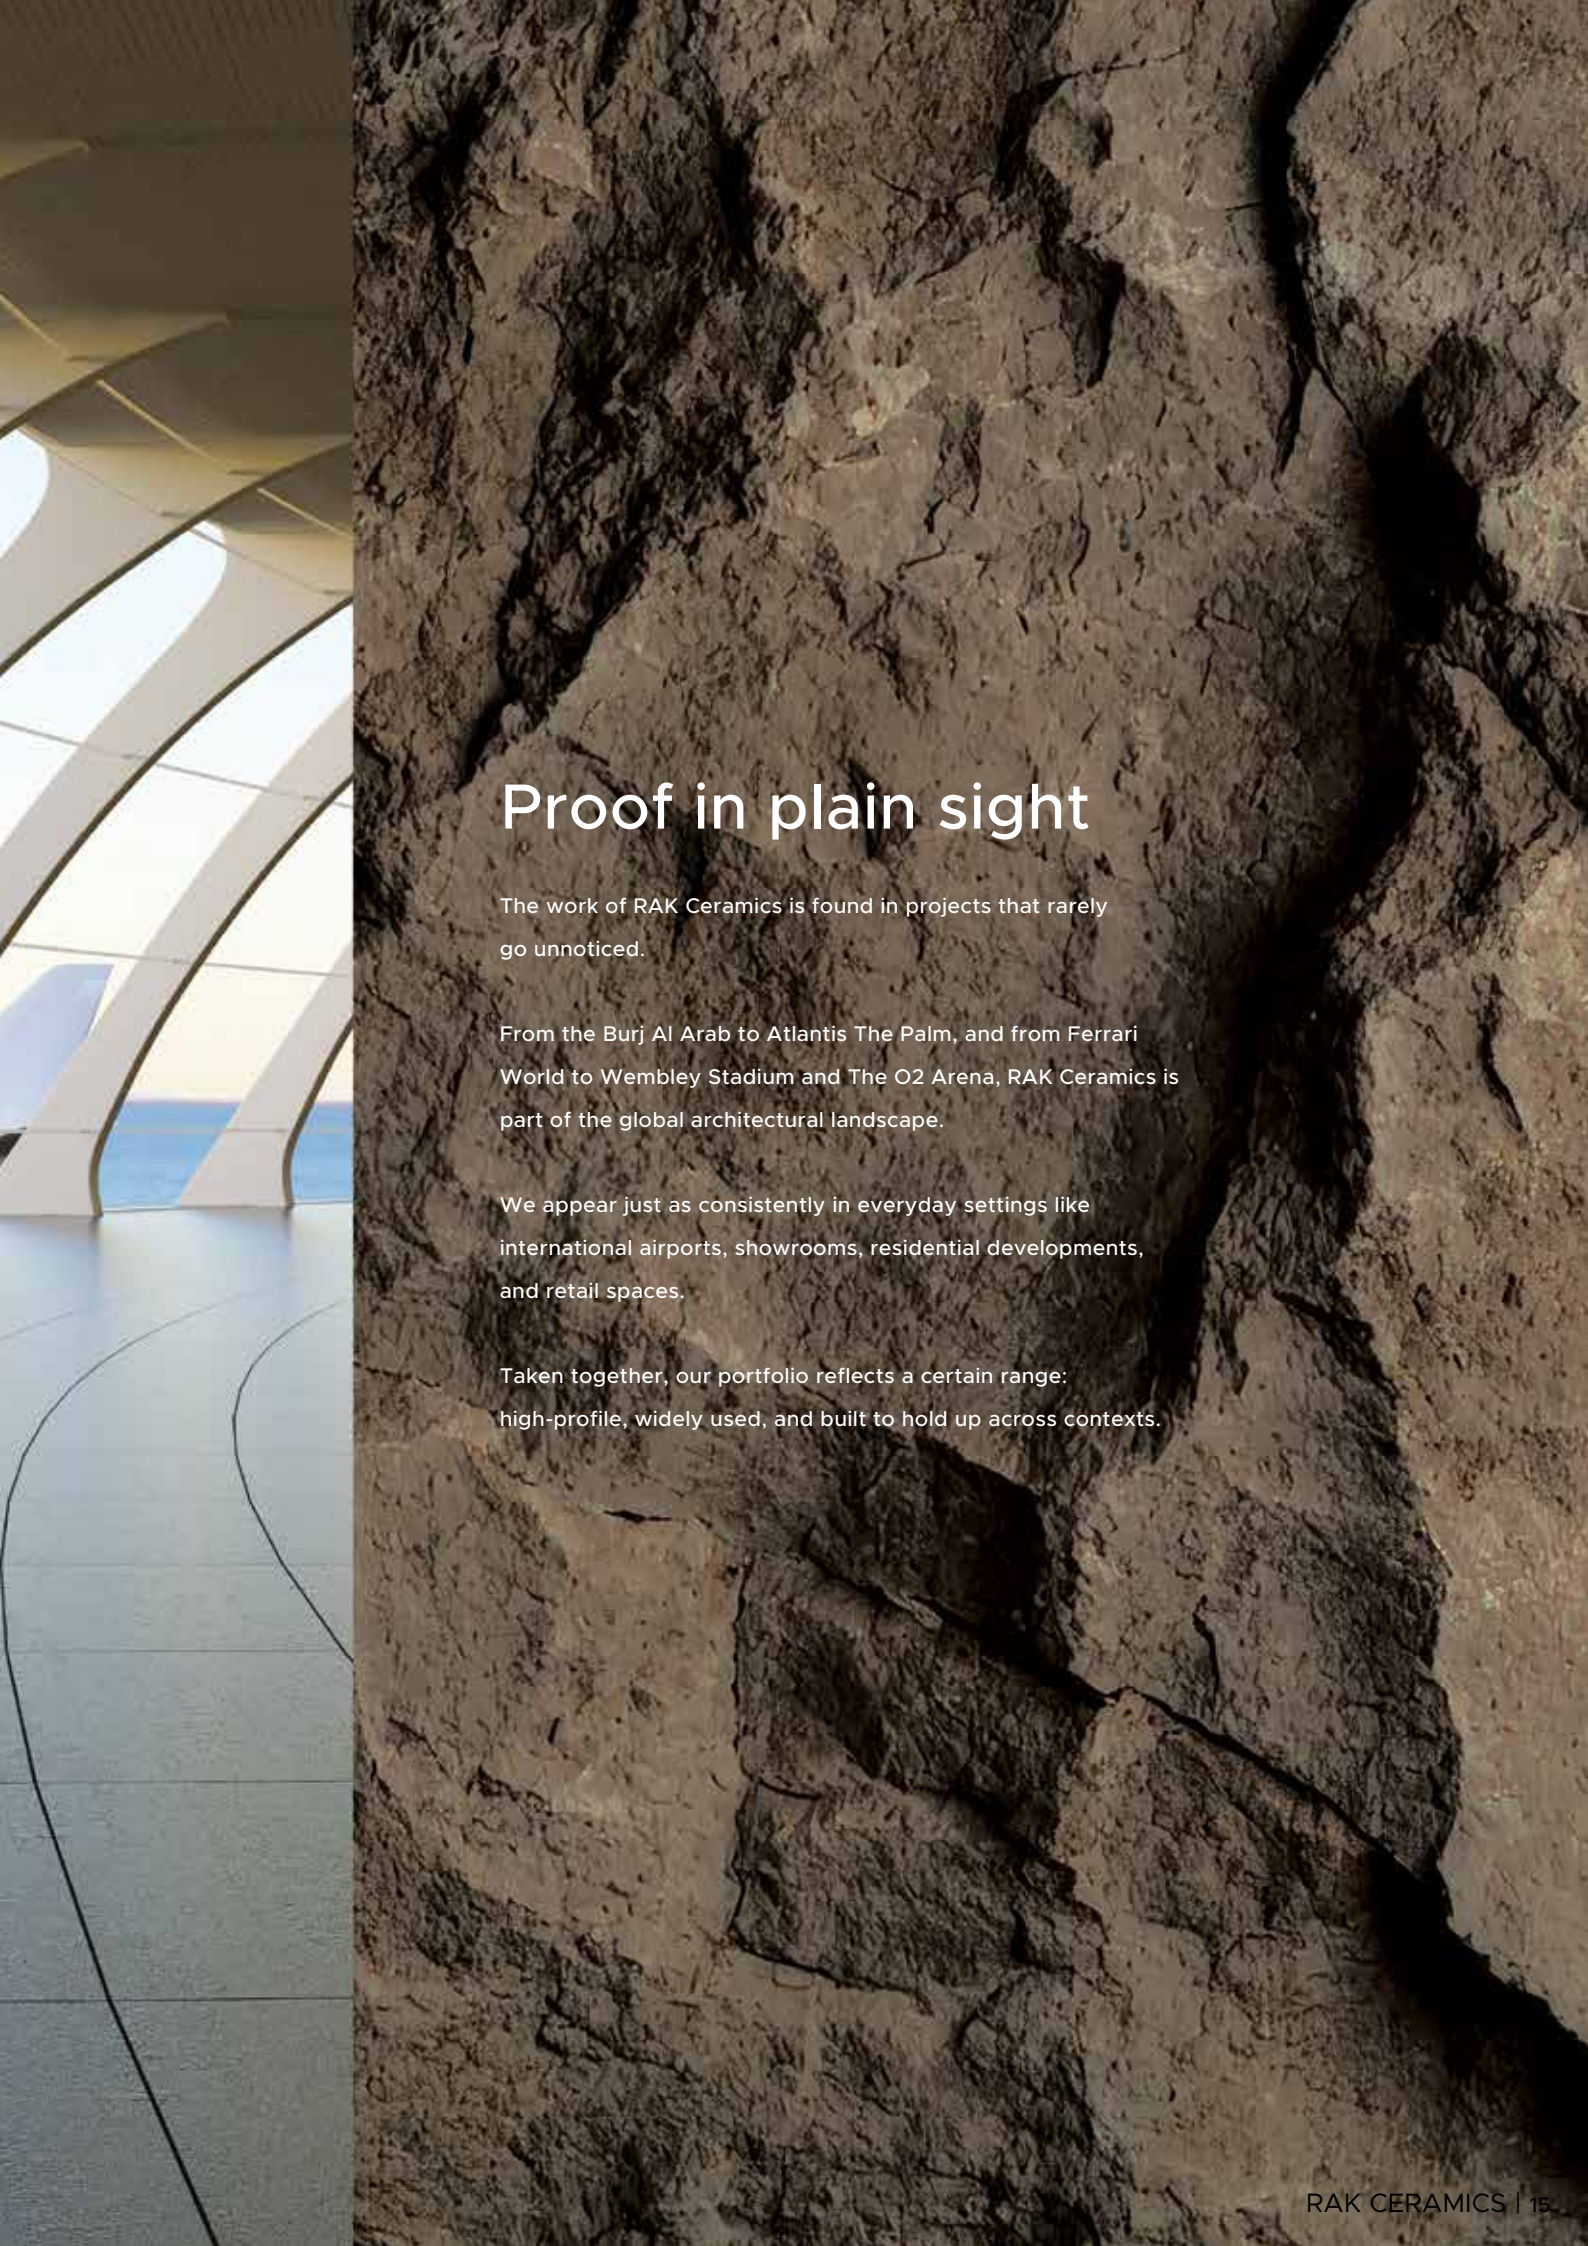

The world's leading ceramics lifestyle solution provider

RAK Ceramics helps architects and interior designers create icons and build marvels. It provides materials that inspire ideas and spark creativity. We aim to design unique and inspiring products that realistically resemble natural materials.

Our passion and expertise combined with careful attention to detail enables RAK to provide designers and end users with a wide range of integrated ceramic solutions, allowing them the freedom to be creative.

Proof in plain sight

The work of RAK Ceramics is found in projects that rarely go unnoticed.

From the Burj Al Arab to Atlantis The Palm, and from Ferrari World to Wembley Stadium and The O2 Arena, RAK Ceramics is part of the global architectural landscape.

We appear just as consistently in everyday settings like international airports, showrooms, residential developments, and retail spaces.

Taken together, our portfolio reflects a certain range: high-profile, widely used, and built to hold up across contexts.

TERRATONE

Inspired by the colours of India's landscapes, Terratone distils earth, mountains, stone, and sky into a palette of beautiful colours. It's perfect for expansive floors or as a backdrop on walls for everyday life because these pieces endure longer than design fads.

Natura

The appeal of natural forms lies in their rather unique ability to make interiors feel instantly welcoming. Inspired by foliage, flowers, botanical patterns, and earthy textures, Natura introduces a layer of visual richness that feels deeply restorative when used in homes.

TECHNICAL SPECIFICATIONS

ICONS

TPOLOGY

**VITRIFIED
TILES**

**FULL-BODY
VITRIFIED TILES**

EDGE

RECTIFIED

SURFACE STRUCTURE

SMOOTH

Tiles with an even and regular surface, free from perceptible projections, lumps, or indentations.

**LIGHT
STRUCTURE**

Tiles with an uneven, irregular surface, with a structure perceptible to the eye and touch.

**HEAVY
STRUCTURE**

Tiles with a highly irregular surface.

FINISH

NATURAL

Pressed tiles with no further work after firing.

LAPPATO

Semi-polished/honed products achieved by polishing the tile's surface with an abrasive wheel, not long enough to attain the luster of a typical polished tile.

**FULL
LAPPATO**

A ceramic lapping process performed with the finest abrasive grain, aimed at removing the smallest imperfections and glaze.

POLISHED

Pressed tiles with a smooth pad, subjected to strong mechanical processing, by removing a significant amount of material after firing, making the surface bright.

SURFACE LOOK

MATT

For a natural looking surface.

SATIN

For a satin-like surface look. Smooth and velvety to the touch.

GLOSSY

The surface has a medium degree of reflection.

**HIGH
GLOSSY**

The surface is highly reflective, almost mirror-like.

COLOUR VARIATIONS

**V1
EVEN**

The least amount of shade variation attainable.

**V2
LIGHT**

Light to moderate shade variation within each carton.

**V3
MEDIUM**

Medium shade variation within each carton.

**V4
STRONG**

Strong shade variation within each carton.

INDICATIONS FOR USE

WALL TILES

FLOOR TILES

**COUNTERTOP
SURFACE**

SUGGESTED APPLICATIONS

**DOMESTIC
PURPOSE**

Residential areas, hotel rooms and bathrooms.

**LIGHT
COMMERCIAL
TRAFFIC AREA**

Indoor public areas subject to medium pedestrian traffic such as restaurants, bars, offices, shops, hotel and convention rooms.

OUTDOOR

Outdoor public environments subject to medium pedestrian traffic such as outdoor terraces, stairs, corridors, raised paving, private garden, swimming pool and wellness areas. Always check slippery characteristics against the intended environment, in conformity with applicable regulations or laws.
