RIMLESS

The Ultimate Rimless Technology for your bathroom

RAK Ceramics delivers the ultimate in technology for bathroom suites.

Based on similar design specifications to sanitaryware in hospitals and medical centres, RAK Ceramics Rimless water closets allows you to experience the same high standards of hygiene in your own home.

RAK Ceramics continues to set new standards of hygiene and water efficiency in the sanitaryware industry, with uniquely engineered water flushing systems that effectively remove waste, helping to keep bathrooms fresh and hygienic.

HYGIENIC AND EASY TO CLEAN
The water closets have no rims to harbour germs, making cleaning quick, easy and more hygienic.

WATER SAVING
Using just 6 litres for the full flush and 3 litres for the half flush, water usage is reduced by a third.

EFFICIENT DESIGN
Design and efficiency can be successfully combined. Water flows vertically and horizontally, before flushing the entire inner surface of the bowl, without splashing.

SILENT FLUSH
Rimless technology allows a faster and more silent flush.

EASY TO CLEAN, WITH LOW WATER CONSUMPTION.

Can we save water in our bathrooms?

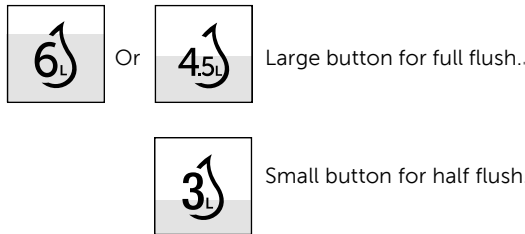

One of the easiest ways to save water is to install a toilet with a dual-flush cistern. Dual-flush cisterns let the user choose how much water to use when flushing the toilet and they are designed for wall-hung, back-to-wall and close coupled water closets.

RAK Ceramics flushing systems, allow you to choose using the full flush or the half flush, with different flushing volumes: 6 litres for the full and 3 litres for the half flush. The cisterns can also be adjusted to flush with a reduced full flush volume at 4.5 litres.

For countries with limited water resources, RAK Ceramics has developed innovative water closets perfectly flushing with a reduced 3 litre single flush.

By using a lower volume of water to flush the toilet you can dramatically reduce your annual water consumption.
